

SELECTED INVESTMENT THESES

1. The "Service-as-Software" Pivot (Agentic AI):

- **Thesis:** Moving beyond "Vertical SaaS" (systems of record) to **Agentic Workflows** (systems of action). We are entering an era where software doesn't just manage data but *executes work* (e.g., an AI agent that doesn't just track invoices but autonomously negotiates and pays them).
- **Target:** Startups building "Compound Workflows" in high-cost labor industries (Legal, Compliance, Construction).

2. FinTech Infrastructure: The "Autonomous CFO":

- **Thesis:** The fragmentation of the "Office of the CFO" creates an opportunity for AI-driven reconciliation and treasury management. The next unicorn will be the "Autonomous Finance Layer" that unifies banking APIs, ERPs, and cash flow forecasting into a single decision engine.

3. Infrastructure for the "Post-Training" Era:

- **Thesis:** As LLM training costs stabilize, value shifts to **Inference Optimization** and **Small Language Models (SLMs)**. I am long on tools that help enterprises fine-tune and run SLMs on edge devices or private clouds, minimizing GPU spend.

DEAL & PROJECT SHEET

Role / Context	Sector	Transaction / Project Description	My Role & Strategic Impact
Wolverine Venture Fund	HealthTech	Series A Investment in AI Diagnostics Platform	Deal Lead. Sourced deal via alumni network. Conducted technical diligence on the CV algorithm. Outcome: Fund invested \$100k; Co. raised Series B at 3x valuation.
McKinsey (PEPI)	EdTech	\$1.2B Buy-Side Acquisition by Mega-Cap PE	Engagement Manager. Led CDD on market sizing and "Net Dollar Retention" analysis. Outcome: Validated 15% upside case; client acquired asset.
McKinsey	Logistics	Buy-Side Diligence on Freight Marketplace	EM / Tech Lead. Audit of "proprietary tech." Discovered target was wrapping public APIs. Outcome: Recommended pass; client avoided \$200M bad bet.
Amazon (Internal)	GenAI / Ops	Launch of "Amazon Q" for Supply Chain	Principal PM. Authored PR/FAQ. Secured \$15M funding. Outcome: Product adopted by 500+ enterprise customers in Year 1.
Rakuten (Corp Dev)	FinTech	Strategic Minority Stake in SE Asia Neobank	Associate. Built synergy model for cross-border payments. Outcome: Investment approved by Board; partnership live in 2024.
