Who we are

We're a globally diverse and passionate team of people who are committed to supporting each other and our customers. Our people are our greatest asset, and we're on a mission to make sure everyone in our team is supported and empowered during their career at Axi.

Who is axi?

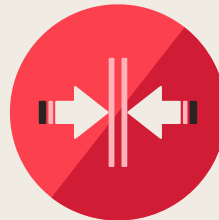

Founded in 2007, we've grown from a two-person startup to an industry-leading online trading company, trusted by customers to give them a trading edge.

Our "EDGE" Key Pillars include:

A trusted partner

We're proud of our global reputation as an honest, fair and trusted broker. We've created a thriving community of confident customers who choose Axi to give them the edge they need to succeed.

Executional excellence

Through our high-performance technology and ongoing investments, we offer lightning-fast execution, raw spreads and flexible leverage, across a wide range of FX pairs, commodities, stocks and indices.

Give traders more

We offer innovative tools and ideas that will give traders the upper hand. On top of these, new products are constantly being added that give traders more opportunities to take on the markets and win.

Global strength, local service

Our size and scale allow us to address the unmet needs of traders in existing and emerging regions, ensuring our service continually gets better and the trader's position always becomes stronger.

What we do

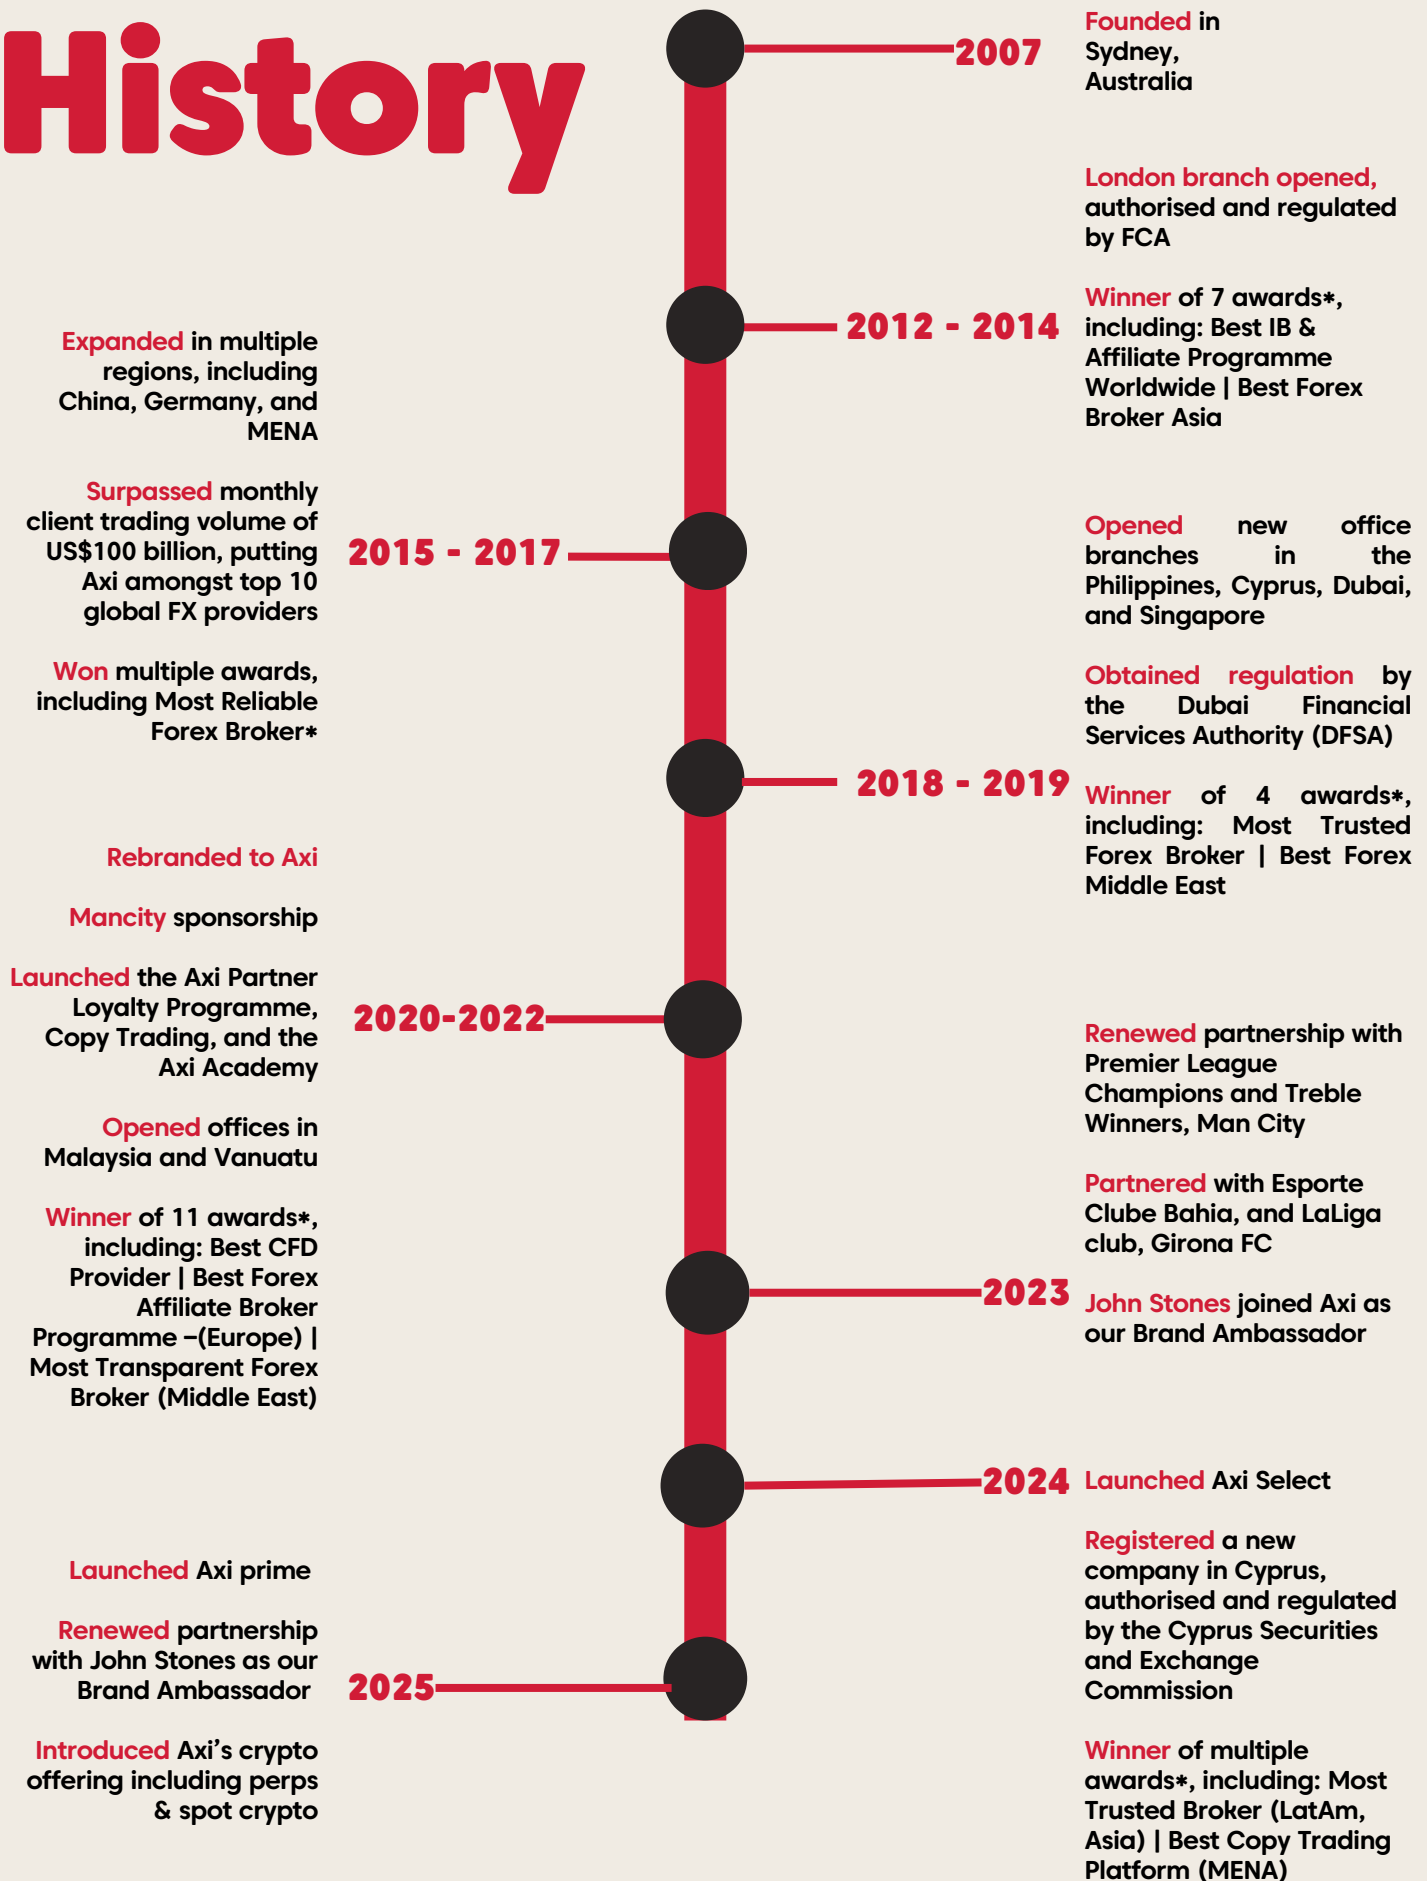

In our core business, we are an OTC (over the counter) derivatives broker.

Simply put, we offer retail clients and high-net-worth individuals a platform through which they can trade (buy and sell) OTC derivative products such as forex (currency pairs such as EURUSD or AUDUSD), stock indices (such as Dow Jones, DAX, S&P 500) and precious metals (such as Gold, Silver, Palladium). Customers trade derivatives (contracts that derive value from the performance of an underlying entity) so clients do not actually ever own the underlying entity or asset.
