FUNDING ROUNDS

LEADERSHIP

Demi Guo
Co-founder & CEO

Harvard Math → Stanford CS PhD (Ron Fedkiw & Chris Manning). Former Meta AI Research. Started Pika from a frustration with existing AI creative tools.

Chenlin Meng
Co-founder & Chief Scientist

Stanford Math → Stanford CS PhD (Stefano Ermon). Co-author of DDIM, the diffusion method underlying DALL-E 2, Imagen, and Stable Diffusion. 30+ papers. Now leads Frontier Research (world models, omni-modality) with the rigor of an independent research lab.

Xuan Li
CTO

Ex-VP and Head of Engineering across big techs and startups, leading backend, agent systems, and the GPU/inference infrastructure behind everything Pika ships.

FUNDING & INVESTORS

- Latest **Series B** in June 2024 led by **Spark Capital**; investors include Lightspeed, Greycroft, Neo, Conviction
- Notable angels:** Nat Friedman, Adam D'Angelo, Jared Leto + others
- Next fundraising** planned for Q1 2027

TECH & ARCHITECTURE

Agent Core

Orchestration, memory, and skill routing across proprietary models and open/close models

Platform

Gateway infra, multi-tier model routing, performance and cost optimization

Skills

Extensible creation capabilities — video, image, audio, editing workflows

Infra

Kubernetes (EKS), multi-provider model serving, GPU / inference at scale

TEAM

A global team built around a Palo Alto HQ. Six functions, no layers: Engineering, Fundamental and Frontier Research, Design & Strategy, Product & Ops, Marketing, and Growth.

- Engineering:** Olympiad medalists and competitive-programming champions — IOI gold, ICPC titles — who ship production systems, not just contest wins. Led by CTO Xuan Li.
- Research:** recognized names already shaping the field, not first-time authors, building multimodal generative models across video, image, audio, and music. Led by Chief Scientist Chenlin Meng.
- Hiring:** Senior/Staff Engineers, Researchers, Product & Growth. Hybrid onsite in Palo Alto preferred; open to remote.

WHY JOIN NOW

Rare timing

Well-funded, pre-IPO, small team. Your equity matters. Your work ships to millions.

The inflection point

Pika is now ready to scale. Join before the compounding starts.

Hard & important

World models, omni-modality, agentic creation, model efficiency at scale. Novel systems work.

Real traction

25M+ users. Real revenue. A product company with users who love it.

Outsized impact

Six teams, no bureaucracy. Every hire still shapes the architecture. You won't be ticket #4,372.

Ready to build the future? Let's talk.
