INTERVIEW TIPS

Strategies and Tips for Success at interviewing with Zynga

The purpose of these tips is to help you prepare for your interview with us.

Whilst following these tips does not guarantee that you will receive a job offer from us, they will give you the best opportunity for success.

Interview Integrity:

It is of the utmost importance that you provide us with honest and truthful information during the interview process. We rely on information provided by candidates during the recruitment process when making our decisions, and if a candidate is found to have provided false or inaccurate information, during the application or screening process, we may choose not to make an offer or withdraw an offer that has been made.

To maintain the integrity and fairness, we require you to personally and independently complete all interview tasks/tests, assessments, and interactions. This means that the use of Artificial Intelligence (AI) tools, automated systems, or any third-party assistance to aid or complete any part of the interview process is strictly prohibited, and if you are found to have engaged in such practices, or we suspect that this might be the case, it will result in the immediate disqualification of your candidacy for your current and any future applications.

Please note that if it is discovered after hiring that the integrity of the interview process has been compromised, for example you have provided untruthful information regarding qualifications or used AI tools or had third party assistance during the interview process, it could result in immediate termination of employment. The core values for any future employee include honesty and authenticity, and we believe that your true skills and capabilities are best demonstrated without external aids.

Virtual Interviewing Tips:

Setting Up:

- Find a quiet space with a good internet connection where you won't be interrupted. Create a zoom account and test your connection.
- Ensure there is enough light in the room so your interviewer can see you clearly.
- Make sure you have a webcam that is working well.
- Use a headset with a microphone to improve audio quality.

We know working at home can have distractions so please do not worry if your children or pets can be heard in the background - we know sometimes it can't be avoided.

Tips for a Successful Interview :

Before the Interview

Review your resume and keep it handy. Be ready to discuss it in detail. Do your **research** on Zynga as this will demonstrate your interest in the role and the company. Some roles require a **take-home assignment** as part of the interview process. You can expect to be asked questions about this in the interview. **Practice answering** behavioural and competency based questions. The STAR method is a great framework for answering questions.

Day of Interview

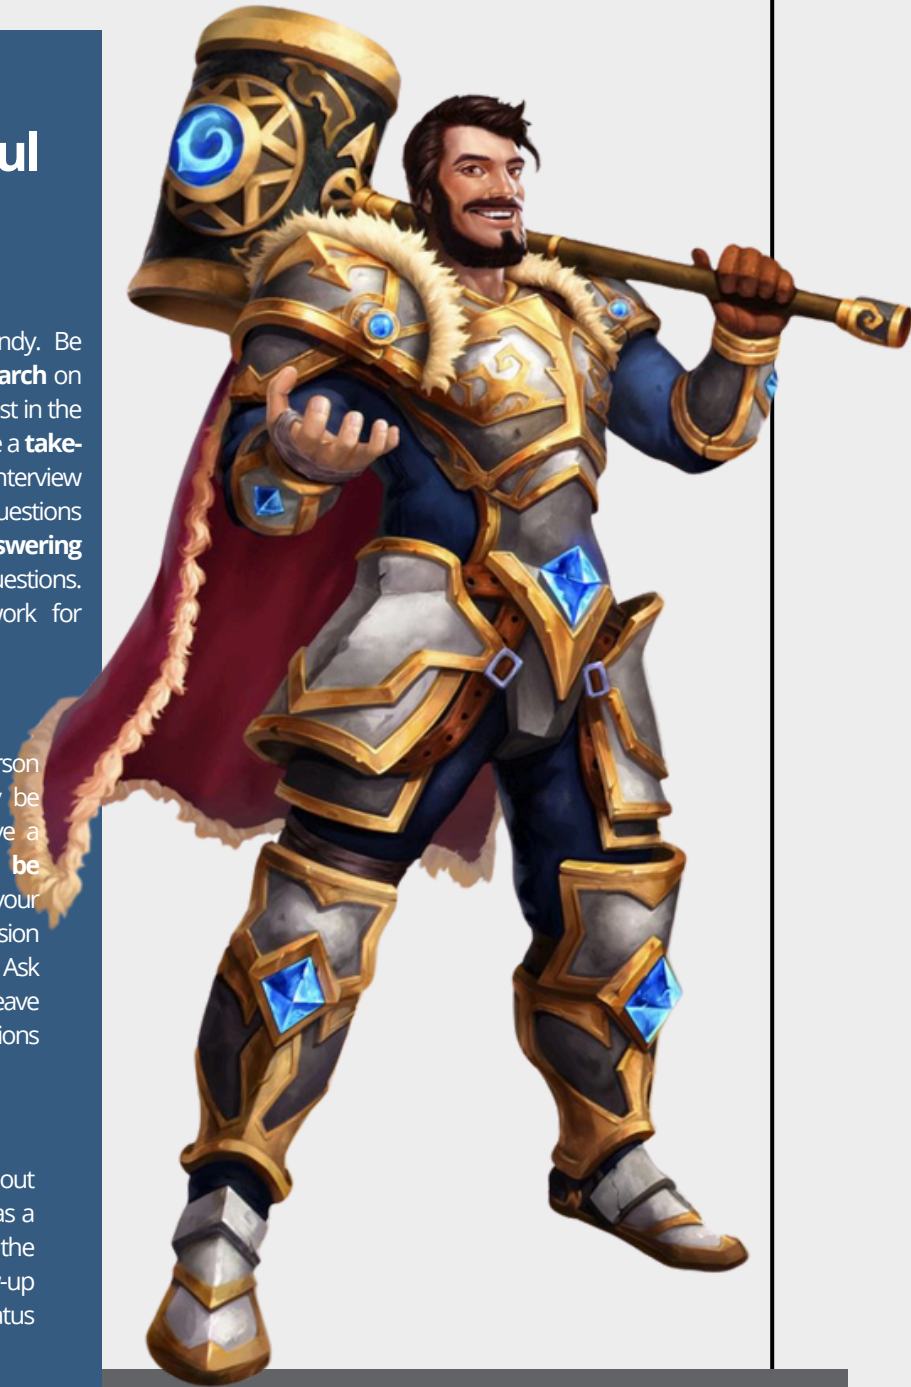

Plan your day - If you are having an in person interview, plan to arrive early. You may be required to sign an NDA. We don't have a formal **dress code**. In the interview, **be detailed**. Make sure to highlight how your knowledge, skills, experience and passion aligns with our requirements. **Be curious!** Ask us questions - It's important that you leave each interview having had your questions answered.

After the Interview

Your recruiter will **follow-up** with you about the outcome of your interviews as soon as a hiring decision is made. Keep in mind that the hiring process takes time. You can follow-up with your recruiter if you'd like a status update.

Stay connected by following us on [LinkedIn](#), [Instagram](#) and [LifeatZynga](#)

Following the end of your hiring process, you will receive an email asking you to complete a voluntary survey providing feedback on your experience. This survey is anonymous and will have no impact on the decision process. We are continuously looking to improve the candidate experience and your feedback is extremely valuable.
