

Welcome to Your *interview*  
*Journey* at Proton

## OUR MISSION

# Building a Better Internet Where *Privacy* is the Default

The internet was supposed to empower people. Somewhere along the way, it became a place where privacy is optional, data is currency, and the user is the product.

At Proton, we are fighting to change that. Not someday. Now. **We build trusted tools that protect freedom and security online, and we do this in small teams driven by elite execution, a relentless focus, and a bias for action.**

## OUR MISSION

# Join the Movement to *Build* a Better Internet

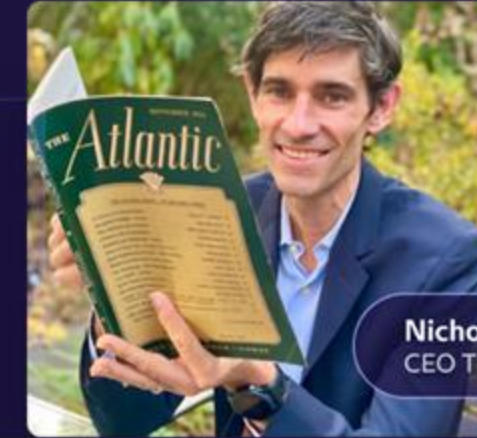

Proton is where the most driven people come to do the best work of their careers.

Our work protects journalists, activists, businesses, families, and everyday people from surveillance, censorship, and data exploitation. Every line of code, every product decision, every campaign helps defend freedom online.

## OUR STORY

# Born at *CERN*, where the Web was Born

Founded in 2014 by scientists who met at CERN, Proton is built on scientific rigor. Sir Tim Berners-Lee, inventor of the World Wide Web, joined as an advisory board member.

Proton started with a crowdfunding campaign — 550% funded. To this day, our only source of revenue is user subscriptions. Zero VC. Zero ads. Zero compromise.

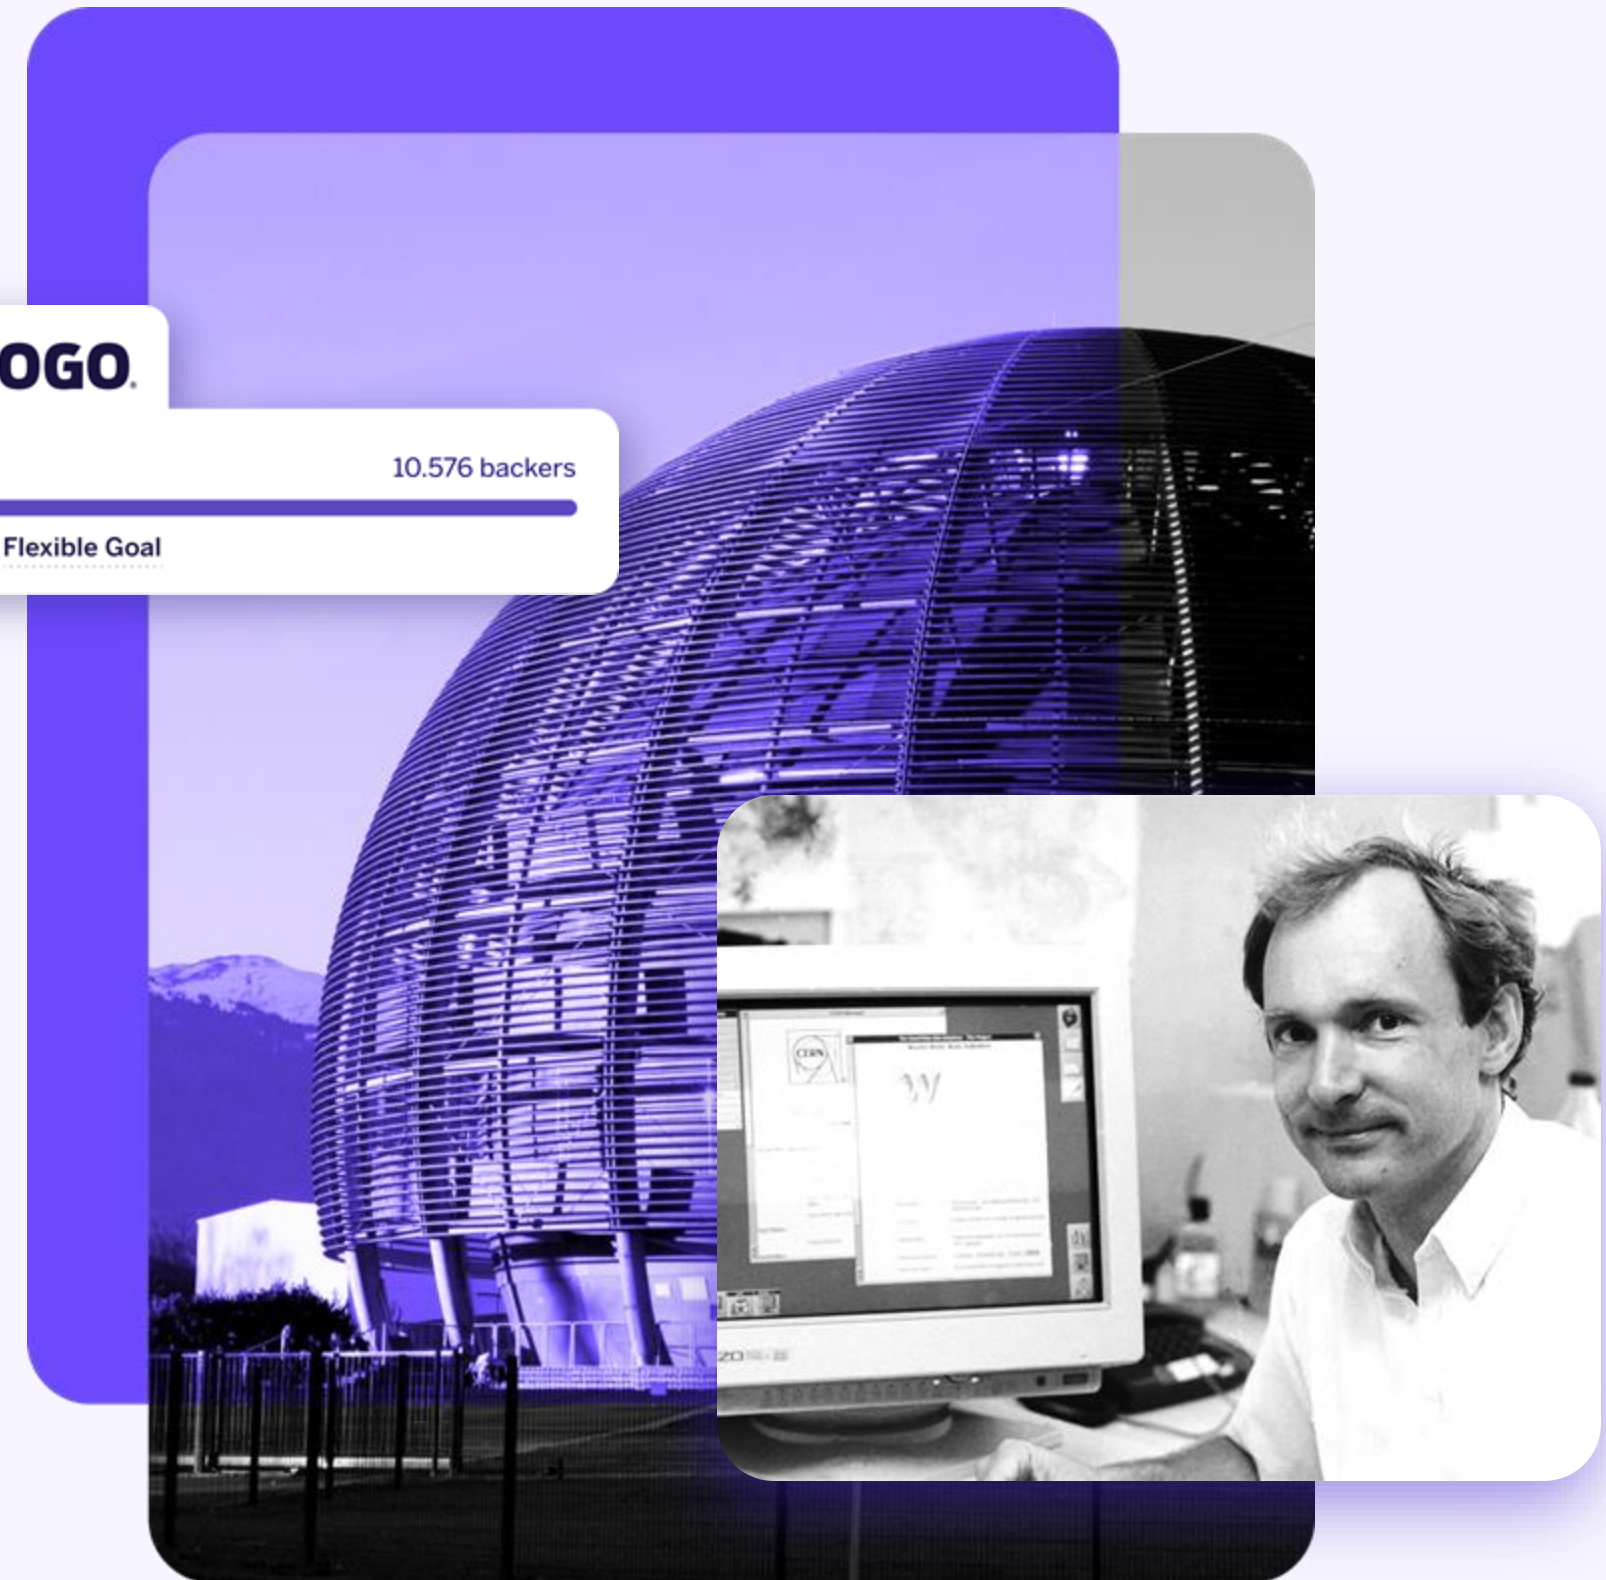

We don't sell ads. We don't access, collect, or sell your data. We don't engage in surveillance capitalism. By choosing Proton, users join a movement of millions

**INDIEGOGO.**

€506.125 EUR

10.576 backers

## OUR PRODUCTS

# The World's first *Privacy First* Ecosystem

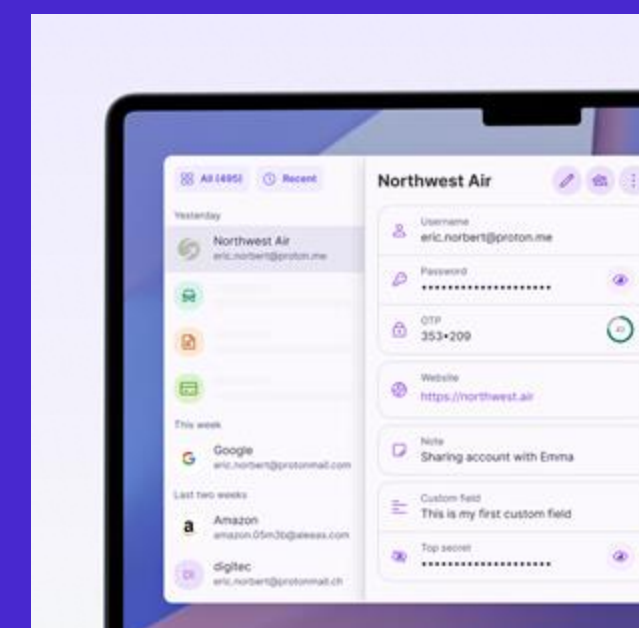

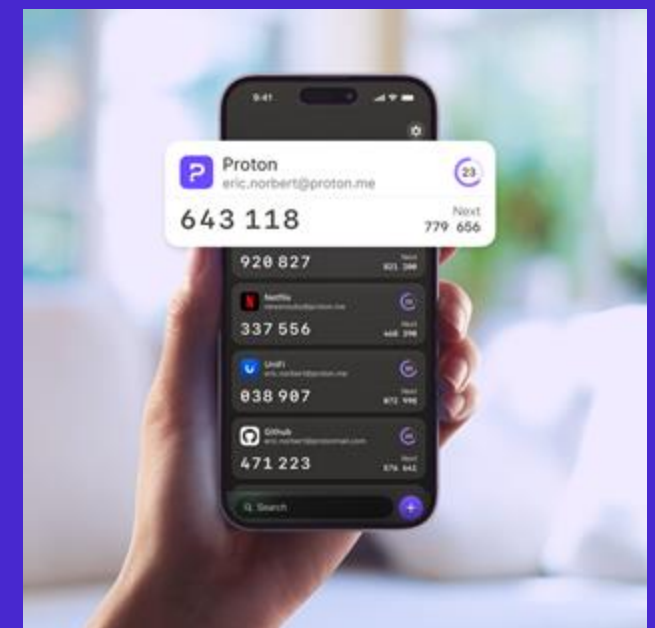

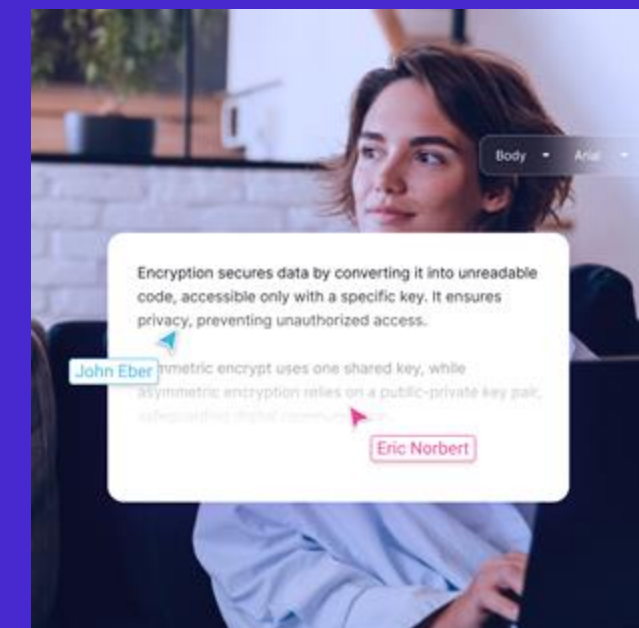

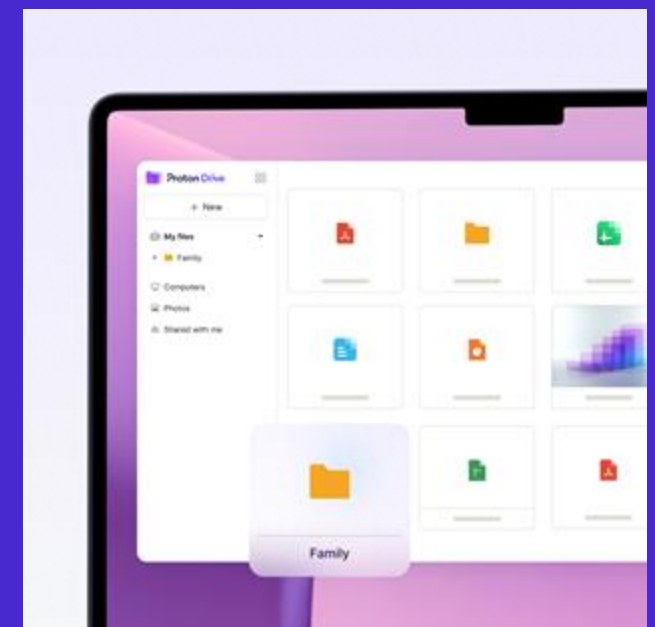

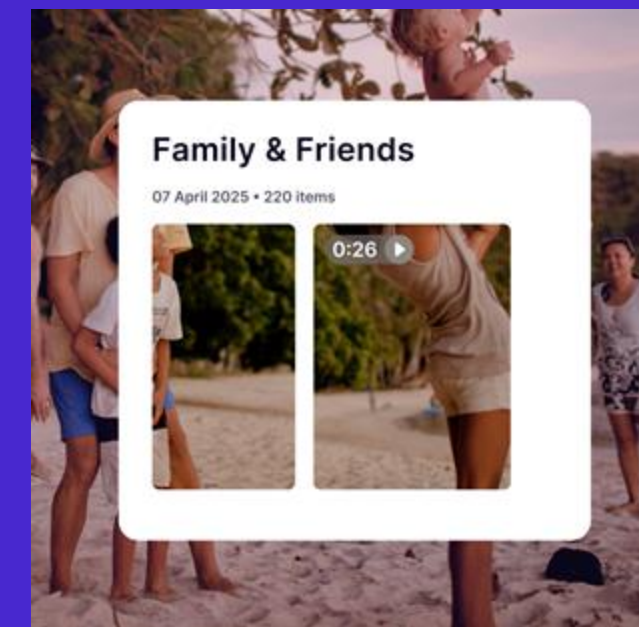

The Proton ecosystem includes easy-to-use **email, calendar, file storage, encrypted docs, VPN, password and identity manager, MFA authenticator, Bitcoin wallet, and private AI assistant.**

Our services are **open source and independently audited** so anyone can verify they are safe and work as we claim.

**Data is secured with end-to-end encryption**, ensuring that no one, not even Proton, can access, monetize, or misuse users' data.

Proton

## OUR VALUES

# The *values* that define how we work.

### **Be relentless**

We are hardworking passionate people. Our edge is our willingness to work harder and our bias towards action, allows us to move faster.

### **Think user first**

Everything we build must be remarkable and driven by real, documented user needs. We don't chase shiny things unless they serve the people we build for.

### **Lead with context**

The why is more important than the how. At Proton, we don't just do things. We know why we're doing them.

### **Be radically candid**

We value clarity over comfort, transparency over politics, and real talk over corporate fluff.

### **Stay lean**

Small, high-talent teams beat big, bloated ones. We use time, money, and energy wisely and solve problems with ingenuity, discipline, and smart execution.

### **Keep a laser focus**

We ruthlessly prioritize initiatives that have the largest business impact. We finish what we start and don't start what we can't finish.

### **Fail fast, fail forward**

Progress beats perfection. Take smart risks, learn fast, share lessons openly. No blame, no shame — just growth.

# Over 600 *Proton's* working in 9 Offices

WHY JOIN US

# What You'll Get at *Proton*

More than a job—a team, a mission, and room to grow.

## People who elevate you

An outstanding team of people who could work anywhere but choose to be here. They'll have your back and push you forward.

## Work to be proud of

Our mission and impact mean the work is something you'll actually want to talk about at dinner.

## Perks that fuel you

Free meals and snacks to keep you going. Team meetups, off-sites, and office events to connect and unwind.

## Career acceleration

You build more in a year here than in three somewhere else. Proton is not a place to coast.

## Intensity with purpose

Proton is a place for people who want real responsibility, direct accountability, and growth that comes from a challenge.

## Front row to growth

You're not just joining a company. Proton is your chance to help shape one of the defining internet companies of this era.

If you thrive on challenge,  
ownership, and doing the best work  
of your life — Welcome.

We look forward to getting to know you.
