

Overview of start-up programs in the Retail/CPG Sector

Your team is working on designing a start-up collaboration program for a Global Retail Major. Before starting on the project, your team wants to develop a basic understanding of the current start-up programs in retail.

You have been tasked to conduct basic secondary research on how retail companies are designing start-up collaboration programs. Your team specifically want to understand –

1. What themes or innovation areas are Retail/CPG companies focusing on?
2. What type of start-ups are they looking for?
3. What is the value proposition they are offering to start-ups?

Your task is to study the following 3 programs and prepare a 3 to 4 slider, or 2 to 3 pager document, to bring your team up to speed:

- Flipkart Leap
- Target Accelerator
- Lowes Innovation Labs

Overview of Innovation in the Insurance Sector

Your team is working on a presentation to the Innovation Council of an Insurance Company. Before starting to work on this presentation, your team wants to develop a basic understanding of the technology disruptions in the Insurance Industry.

You have been tasked to conduct basic secondary research on the key technologies and use cases in the Insurance Industry. Your team specifically want to understand –

1. What themes or innovation areas are Insurance Companies focusing on?
2. What type of technologies are they experimenting with?
3. What are some good examples of innovations in the areas of Customer Experience and Operations?

Your task is to prepare a 3 to 4 slider, or 2 to 3 page document, to bring your team up to speed.

Overview of Innovation Management Platforms

Managing the innovation process is becoming very cumbersome for one of your clients. They are trying to understand the different types of Innovation Management Platforms. Hence, they have requested the innovation team at Zinnov to give them an overview and help them decide which platforms they should consider.

Your team leader has asked you to conduct a quick secondary research and build a note of the various Innovation Management Platforms available in the market. You can create a 3 to 4 slider or 2-to-3-page document for this.

Marketing Plan for a Start-up Collaboration Program

Your team is running the India start-up program for a G500 Healthcare Major. The program aims to create solutions to help healthcare providers deliver precision health. The program aims to attract start-ups across the healthcare continuum, including preventive healthcare, precision diagnosis and treatment in a timely and affordable manner, improving workflows that place patients at the centre and clinicians, technicians, radiologists, and IT support as the ecosystem surrounding the workflow.

Your team's goal is to attract 200 high-quality start-up applications in the next three months. The budget allocated for marketing is USD 40,000.

Your team leader has tasked you to build out a high-level marketing plan for internal discussion. The plan should answer some of the following questions –

- Which channels will we use for marketing?
- What specific partnerships will we require?
- What are the key campaigns and activities we should run?
- What are the key metrics that we should track?

Please build a 3 to 4 slider or 2-to-3-page document for this discussion.

Hackathon Judging Criteria and Process

Your client has run four hackathons in the past year. For each hackathon, the client sourced a minimum of 200 ideas, and at the end of every hackathon top three ideas were announced. Six ideas that came out of the hackathons in the past year have been productized, but only 1 of them was a top idea picked by the hackathon jury. The client feels there is a gap in the way they choose top ideas and what is beneficial for the company to adopt. Hence, they want to relook their judging criteria and jury process.

Your team leader has tasked you to learn about the processes companies adopt for picking top ideas and build out a note for internal discussion.

The note should cover –

- What should be the judging criteria to pick top ideas?
- Which stakeholders should be involved in picking the top ideas?
- What should be the overall process to pick the top ideas?

Please build a 3 to 4 slider or 2-to-3-page document for this discussion.
