recommend me books to read this winter

Here are three books that match your taste for historical fiction. I also included one non-fiction title that's trending now.

About Algolia

Our Purpose

To transform how the world discovers information, helping people find what they need without foraging. Algolia transforms discovery into something effortless, understanding intent, surfacing what matters, and delivering results instantly.

Our Vision

We understand people’s intent and show them what they want.

Our Core Values

At Algolia, our values guide how we work, make decisions, and show up for each other every day. They shape how we collaborate, how we serve our customers, and how we continue to grow together as a global team.

Global Presence and Diversity

At Algolia, global isn’t just where we work – it’s who we are. Our employees span continents and cultures, collaborating across time zones to power customers in more than 140 countries.

We celebrate the diversity of region, language, and thought that makes our team stronger, more creative, and more connected to the world we serve.

Meet Our Leaders

QUICK STATS

18,000+ Global brands served	100% Compliant & secure across all major certifications	500,000+ Developers supported worldwide
800+ Employees advancing AI retrieval innovation	#1 Recognized leader in the 2024 & 2025 Gartner Magic Quadrant for Search & Discovery	1.75+ trillion Searches powered annually

What we do

Our Product

Algolia is the leading AI search and retrieval platform, powering trillions of searches a year for thousands of businesses and millions of developers worldwide. Renowned for its developer-first, API-first design and the fastest AI search technology (combining keyword, vector-based NeuralSearch, rules, and personalization), Algolia is the largest hosted search engine available today.

Why Algolia?

Our goal is to make those moments effortless through retrieval-powered AI Search; technology that finds the right answer, not just the next one, without foraging.

We're Building the Future of Discovery

Search used to end with results. Now, it begins with understanding.

Algolia's retrieval-powered AI blends vector search, semantic reasoning, and structured retrieval to deliver instant, context-aware answers at global scale. We're designing the connective tissue between human curiosity and machine intelligence, and it's changing how people discover, shop, and learn.

We are building the intelligent layer that makes the world's digital experiences feel intuitive, natural, and alive.

We're Engineering Retrieval That Thinks Like You

Our AI Search doesn't guess; it retrieves with purpose.

We fuse search precision with generative intelligence, creating systems that know what users mean, not just what they type. From ecommerce to SaaS, media to marketplaces, we're redefining speed and relevance in the age of AI.

Sub-15 milliseconds. Billions of queries. Zero compromise. That's retrieval-powered AI Search, perfected.

We're Builders of Real-Time Intelligence

Algolia is the backbone of digital commerce and content discovery.

Our platform connects [more than 18,000 companies](#) and millions of developers to the world's fastest, most scalable retrieval-powered AI Search.

Working at Algolia means shaping the way information moves, instantly, safely, beautifully. Every keystroke is a moment of creation. Every search is a signal of intent. We turn both into insight and understanding.

We Design with Integrity

Retrieval-powered AI Search is only as good as the trust it earns. At Algolia, we build systems that are privacy-safe, transparent, and designed for human benefit. We believe AI should respect context, not exploit it; amplify relevance, not noise.

Trust isn't a feature, it's our foundation.

We Work Like Our Product: Fast, Open, and Scalable

We move quickly, stay curious, and empower people to lead from wherever they are.

Remote-first, globally connected, and deeply collaborative, Algolia is a place where ideas scale as fast as our infrastructure. High velocity. Low ego. Maximum impact.

We're Defining the Next Chapter of AI

Generative and agentic AI needs retrieval to stay grounded in truth. Algolia's retrieval-powered AI is that foundation—fast, precise, and adaptive. We're not following the AI wave; we're building the system that keeps it human.

[We don't just build AI that talks, we build AI that understands.](#)

People & Perks

Work Environment

- Global, cross-functional, collaborative teams that learn and grow together
- Autonomy to lead your work and make decisions
- A culture that encourages experimentation, learning, and innovation

How We Stay Connected

- Hackathons and internal demos to spark innovation
- Mentorship programmes that foster growth and connection
- Async communication that keeps our global teams aligned and informed
- Monthly company and departmental All Hands to share updates and celebrate progress
- Virtual events and social get-togethers that keep our community connected

Leadership Style

- Transparent and empowering: We share information openly and trust our teams to make informed decisions.
- Focused on coaching, not controlling: Our leaders guide, support, and remove obstacles so people can do their best work.
- Invested in employee growth: We prioritize development and learning to help every Algolian thrive in their career.

Benefits & Perks

- Medical, dental, vision coverage
- Mental health support via Modern Health
- Generous parental leave
- Generous vacation allowance
- Flexible Time Off policy and a Work from Anywhere policy for up to 30 days a year.
- Global Wellness Days - company-wide day off to recharge
- Growth & Learning opportunities, including access to training, conferences, and internal mentorship programmes

Hybrid/Remote Flexibility

- We trust our employees to choose the work setup that works best for them. Whether you're fully remote or working a few days in the office, we give you the flexibility to work in a way that helps you thrive. With offices in the US, France, the UK, Australia, and remote hubs around the world, we ensure you stay connected wherever you are.

Giving Back: Volunteer Days & Donation Matching

- Giving back is at the heart of our culture. Every employee gets two paid volunteer days a year to dedicate to a cause you care about. We also have an annual Global Giving Day, where teams volunteer together. Plus, we match employee donations to eligible charities, amplifying your impact.

Our Customers

Our 18,000+ customers don't settle. They build experiences that feel effortless, intuitive, and instantly relevant. They're creators, disruptors, and pioneers—companies redefining how people discover products, content, and answers in a digital world. They choose Algolia not simply for speed or scale, but for precision. For the ability to understand intent. To personalize without friction. To search, and discover, in a blink of an eye.

Real stories. Real results. Have a look

Key Highlights

- Trusted by leading brands such as LVMH, Slack, Under Armour, Zendesk, and Decathlon
- We're a Leader in Gartner's Magic Quadrant and Forrester Wave for search and product discovery. A leader in G2, and ranked among top workplaces globally
- Headquartered in San Francisco with offices across Paris, London, Sydney, Bucharest and New York, and hubs across USA and Europe
- [Over 55+ awards](#)

The Interview Process

Recruitment Philosophy

At our core, we seek out great talent for their skills, potential, and values. We want to understand not only what you've accomplished, but also how you think, collaborate, and grow.

Diversity and inclusion are **foundational principles to our recruitment team**. We know that diverse teams bring richer perspectives, foster innovation, and ultimately drive better outcomes. Every candidate deserves a process that is **fair, transparent, and respectful**.

What to Expect from our Hiring Process

We tailor our approach depending on the role, but most candidates will move through the following stages.

What We Look For

We hire for culture-add, not just culture-fit. Candidates who thrive at Algolia typically demonstrate:

- Alignment with our values
- A growth mindset and eagerness to learn
- Problem-solving and impact-driven thinking
- Strong collaboration nature
- Clear, thoughtful communication skills
- Deep, functional expertise for the role

01

Introductory Call with Recruiter

- Introductory call to learn more about you beyond your resume
- We'll discuss the role, your career goals, and alignment with our values and culture.
- You'll learn more about our process, timelines, and what to expect moving forward

02

Hiring Manager Interview

- A deeper, role-specific conversation with the hiring manager that will cover your experience, motivations, and how your profile aligns with the team and role
- A chance to ask questions about team dynamics, expectations, and leadership style

03

Assessment Stage

- Designed to showcase how you think, solve problems, and apply your skills in practice.
- Go-To-Market roles: This may include a mock call, a strategy presentation or take home assignment
- For Technical roles: This may include a live coding challenge, a system design discussion, or a technical take home assessment

04

Final Rounds

- Conversations with cross-functional partners and future peers to explore collaboration and team fit.
- Meet with cross-functional partners and future peers.
- Often includes a conversation with a member of our leadership team.
- A chance for both of us to assess long-term mutual fit.

How to Prepare – Candidate Prep

Interview Tips to Help You Stand Out

To help you prepare effectively for your upcoming interviews, here are a few best practices we recommend:

Use the STAR Method when answering Behavioral Questions

- Example:
 - i) Tell me about a time when...
 - ii) Describe a situation when...
- STAR format (Situation, Task, Action, Result)
- Provide clear, structured, and specific responses that directly address the question and demonstrate your relevant experience

Be Clear, Concise, and Clarify

- Clarify: If question is unclear, don't hesitate to ask for clarification
- Keep your responses focused and relevant to the question being asked
- When appropriate, provide specific example(s) to illustrate how you have navigated a situation or collaborated across different functions

Reflect on [Algolia Core Values](#)

- Take some time to explore Algolia's core values and reflect on how your own values may align with our values
- When appropriate, consider framing your answers to represent qualities like "care," "trust," or "grit."

Be Your Authentic Self

- We want to get to know your approach, experience and perspective as a candidate
- Do not read from AI-generated content during the interview – it's often noticeable when answers sound scripted and we're more interested in your unique insights and experiences

Prepare Thoughtful Questions

- Bring questions that help you understand the role, team, and company
- Consider preparing different questions for each interviewer in order to gain a well-rounded view of the team and role.
